Mathematics and Computers in Simulation 34 (1992) 593–595
North-Holland

Author Index to Volume 34 (1992)

(The issue number is given in front of the page numbers.)

Abou-Rabia, O., *see* **Ören, T.I.** (3–4) 219–229
Ameling, W., Simulation of distributed functions (3–4) 207–218
Asaithambi, N.S. and **J.B. Garner**, Taylor series solution of a class of diffusion problems in physiology (6) 563–570

Birta, L.G., *see* **Ören, T.I.** (3–4) 219–229
Breitenecker, F., Models, methods and experiments — A new structure for simulation systems (3–4) 231–260
Burger, J., J.-S. Le Brizaut and **M. Pogu**, Comparison of two methods for the calculation of the gradient and of the Hessian of cost functions associated with differential systems (6) 551–562

Cahlon, B., I.E. Schochetman and **M. Shillor**, Optimal placement of heat sources on a rectangular grid (3–4) 351–364
Casulli, V., *see* **Pistella, F.** (3–4) 365–373
Ceric, V. and **R.J. Paul**, Diagrammatic representations of the conceptual simulation model for discrete event systems (3–4) 317–324
Chan, K.-Y., *see* **Choi, Y.S.** (2) 101–112
Choi, Y.S. and **K.-Y. Chan**, Fractional step algorithm for a model problem in electrochemistry (2) 101–112

Drescher, G. and **B. Fellenberg**, Simulation of weakly correlated fields with an application to vehicle dynamics (5) 397–409

Fellenberg, B., *see* **Drescher, G.** (5) 397–409
Fossard, A.J., Some reflexions about nonlinear control (6) 571–583

Gardiner, J.R., *see* **Silverberg, L.** (2) 163–181
Garner, J.B., *see* **Asaithambi, N.S.** (6) 563–570
Gong, W.-B. and **H. Schulzrinne**, Application of smoothed perturbation analysis to probabilistic routing (5) 467–485

Hebert, D.J., Simulations of stochastic reaction-diffusion systems (5) 411–432
Hu, J., *see* **Rozenblit, J.W.** (3–4) 261–282

Jaiswal, M.P., C.L. Sharma and **Karmeshu**, Stochastic analysis of a nonlinear machine interference model (5) 451–458
Jávor, A., Demon controlled simulation (3–4) 283–296

Elsevier Science Publishers B.V.
